

# HOW TO LOCATE A ROOF LEAK!

The leak doesn't always come from directly above the drip!

Sometimes it runs down the rafters or other contents in attic!

Leaks in your roof can lead to a number of hazardous issues such as mold growth as well as the pooling of moisture throughout your home which can lead to structural damage and more.

## TOP TIPS TO LOCATE A ROOF LEAK!

### 1 BE AWARE OF THE SIGNS

- Droplets of water found
- Stained or Discoloured Ceilings
- Wet Carpets

### 2 REMEMBER TO CHECK THE ATTIC

Follow the drips with Flashlight and you should find the entry point!

**KEEP IN MIND,  
THE DRIP  
MAY NOT BE  
DIRECTLY BELOW  
WHERE THE WATER IS  
ENTERING THE HOME!**

### 3 MAKE IT RAIN!

Get a professional to go up on the roof and spray down the roof to find the location of the leak.

### 4 TRY THE WALLS

Soft or bubbling wall paper can mean that leaks are going into the walls. Pay attention around bay windows and lookouts.

Work as a team, have someone looking in the attic\*\* while another simulates the raining conditions.

According to the office for National Statistics, **1 of 3 people injured at home are from Falling!**

had injuries at home

**PLEASE BE CAUTIOUS  
WHEN CHECKING FOR LEAKS**
